POLICY 04 - ENVIRONMENT

ISO 14001:2004 4.2

S2S Electronics Environmental Policy

S2S Electronics aims to implement an environmental policy through a cycle of continual improvement. This policy applies to all employees, departments and functions throughout the manufacturing facility.

We Will:

- Make environmental concerns an integral part of planning, decision making, management systems and in the setting of objectives and targets.
- Promote resource sustainability by seeking ways to reduce energy consumption and material needs.
- Implement waste management strategies that promote waste minimization, re-use, recovery and recycling where applicable. Where these options are not available, we will ensure that our waste is disposed of in a way that minimizes its impact on the environment.
- Comply with and regularly review all applicable laws, regulations and other requirements as they relate to our business.
- Provide management leadership to encourage and communicate the policy and the use of environmental best practises throughout the company.
- Ensure that our policy is available for public review through the company websites.
